for Experimental Biology

## Robert J. Freishtat, MD, MPH

### *FASEB Board of Directors*

Robert J. Freishtat, MD, MPH is currently Associate Chief for Academic Affairs, Division of Emergency Medicine at Children's National Health System and Associate Professor of Pediatrics, Emergency Medicine, and Integrative Systems Biology at George Washington University School of Medicine and Health Sciences. He received his MD from the University of Maryland in 1997 followed by Pediatric and Pediatric Emergency Medicine training at the University of Rochester (Rochester, NY) and Children's National Medical Center (Washington, DC), respectively. During this time, he completed a MPH in Epidemiology and Biostatistics at the George Washington University School of Public Health and Health Services.

Dr. Freishtat's lab has been continuously funded by the National Institutes of Health since 2003 including K23 and R01 grants and is the principal investigator of The AsthMaP™ Project. His current research interests include systems biology investigations of injury/repair in the lung with particular focus on airway epithelial stem and progenitor cell proliferation in asthma and drug development for Acute Respiratory Distress Syndrome in sepsis. He has authored or co-authored over 60 articles and book chapters in the fields of asthma, sepsis, and emergency medicine. In addition, he was the recipient of the 2011 co-recipient of the International Klosterfrau Award for Research of Airway Diseases in Childhood.

Dr. Freishtat is on the editorial board of the American Journal of Respiratory Cell and Molecular Biology and reviews for multiple journals. He reviews grants for the National Institutes of Health as well as several international grant organizations. He is Past-President of the American Federation for Medical Research and an active member of the American Thoracic Society and Society for Pediatric Research.
