

National Institutes of Health

State Funding Facts for FY 2016

The National Institutes of Health (NIH) is the nation's primary medical research agency, supporting research efforts in all 50 states and the District of Columbia. Its **mission** is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce the burdens of illness and disability.

NIH Appropriations

CALIFORNIA BY THE NUMBERS¹

- \$3.686 billion** in NIH funding
- 416** NIH-funded institutions
- 7,720** NIH grants awarded
- 46** Congressional districts with NIH grants

NIH Funding of Select California Institutions

Institution	Total Funding
University of California (Berkeley; Davis; Irvine; Los Angeles; Merced; Riverside; San Diego; San Francisco; Santa Barbara; Santa Cruz)	\$1,870,713,947
Stanford University	\$427,012,784
Scripps Research Institute	\$213,691,567
University of Southern California	\$212,108,536
California Institute of Technology	\$63,095,448
Kaiser Foundation Research Institute	\$62,450,240
California State University System (across 17 sites)	\$61,916,245
Sanford-Burnham Medical Research Institute	\$54,246,070
Cedars-Sinai Medical Center	\$47,454,095

NIH Funding Improves Health in California

- 10** NCI-designated cancer centers are located in California.
- 216** NIH-supported clinical trials were initiated at California institutions in FY 2016.²

INVESTMENT IN NIH RESEARCH BENEFITS THE CALIFORNIA ECONOMY

- California institutions received \$127 million in NIH grants in FY 2016 to train the next generation of innovative scientists.¹
- A total of 300 California businesses received NIH funding totaling \$240 million for the research and development of technologies with potential commercial applications.¹
- In 2014, California was home to 8,762 bioscience business establishments. Residents held 242,557 bioscience industry jobs, and the average annual wage in the bioscience sector was \$63,551 higher than the private sector overall.³
